Sensorberg provides an open digital ecosystem for smart spaces, composed of modular hardware and secure, customisable software.

We provide solutions for access control, facility management, smart home management, smart storage, and more.

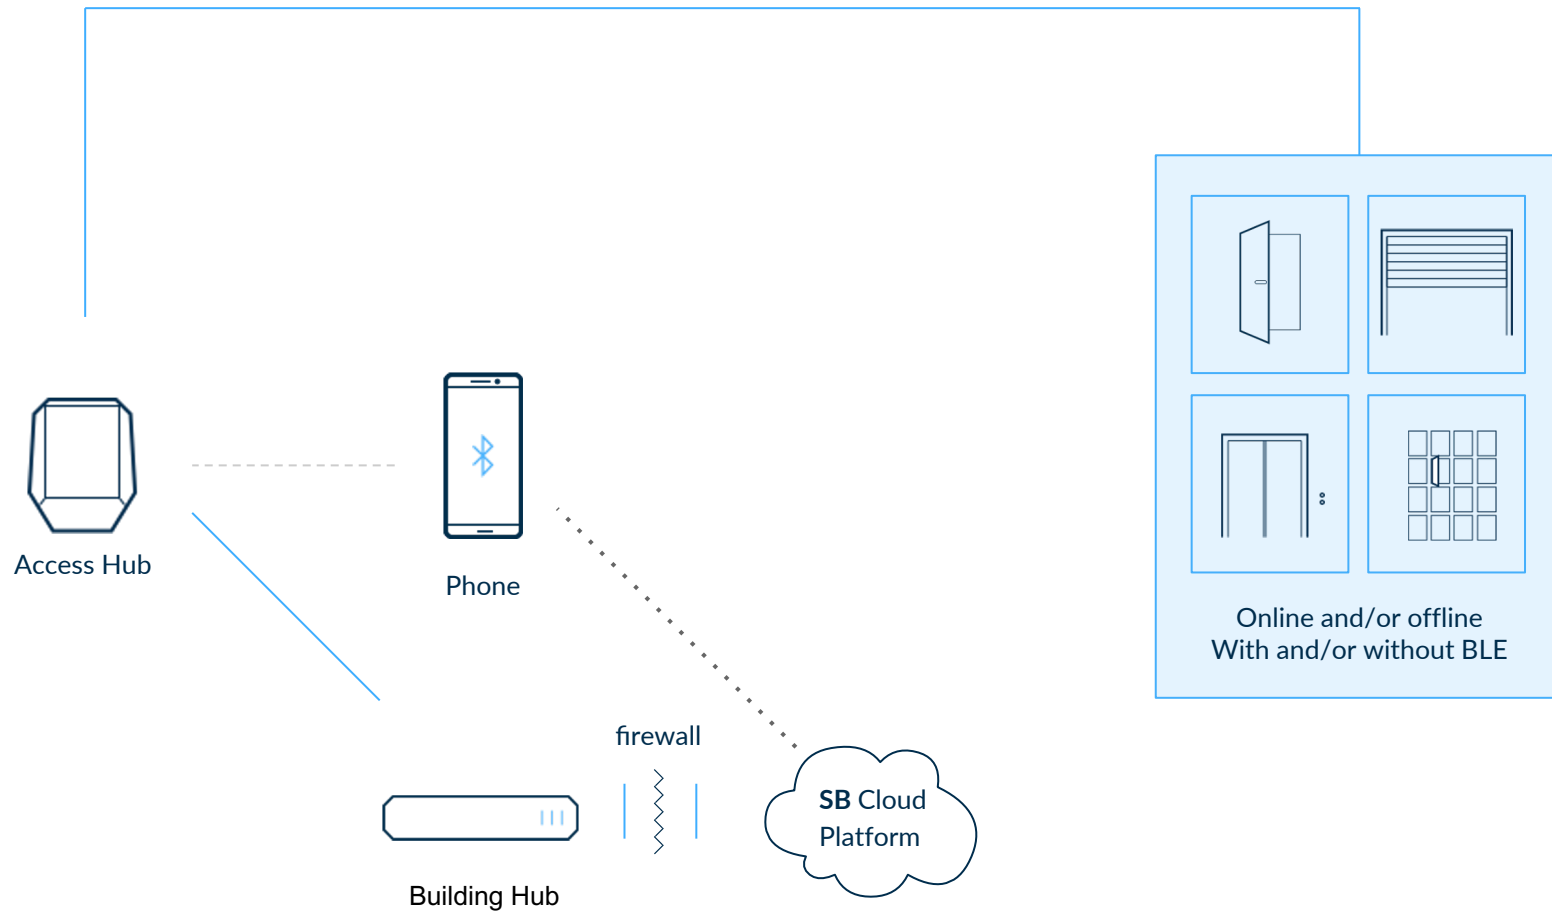

We believe in shaping spaces so that people can focus on what's truly important.

SOFTWARE PORTFOLIO

▲ Sensorberg software overview

Whitelabel App

Our iOS/Android app provides digital access, Smart Spaces control, smart metering information, and more, and can be branded as needed.

Platform

Our platform offers management of your digital access estate, your NFC and Bluetooth cards, your members, meeting room and locker bookings, rule systems, and more.

SDK

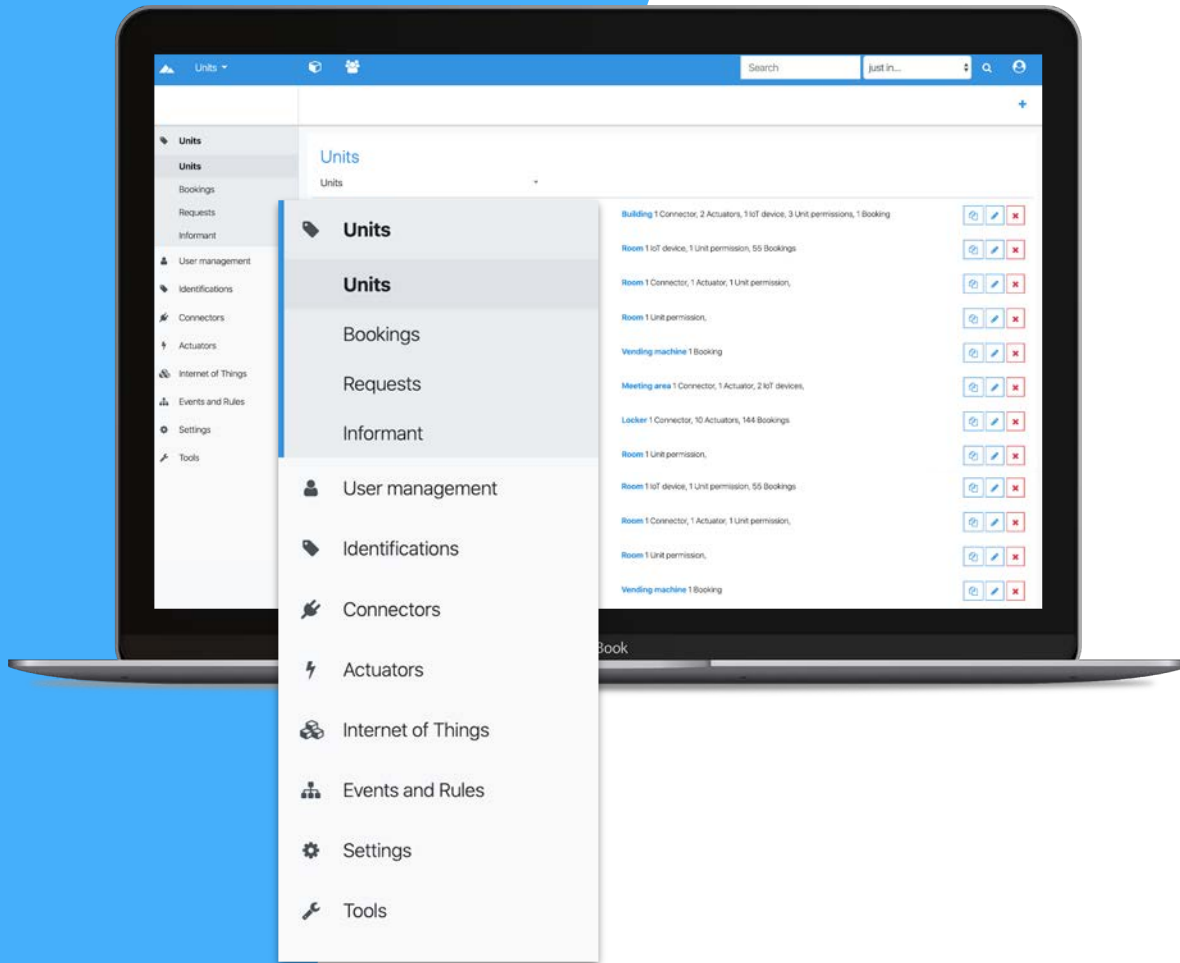

Our SDKs and documentation make it easy to integrate our platform functionality into your existing iOS and Android apps.

API

For integrations with your own platform or more complicated client development, our API provides highly-secure, fine-grained access to our functionality.

PLATFORM

Our platform allows building owners and operators to manage digital access, IoT devices, bookings for lockers or meeting rooms, monitor smart metering, and more.

We provide secure access by browser, with a permission structure to handle building owners, building managers, office managers, and users.

Sensorberg Design

Branded Design

APP

Our app, available on iOS and Android, gives your user digital access, allows them to book meeting rooms or lockers, manage the devices in their Smart Spaces, and more.

The app can be distributed privately or publicly, with the option to rebrand it to suit your needs.

APP Modularity

On top of:

- Digital access
- Booking meeting rooms
- Booking lockers
- Setting silent alarms
- Managing IoT devices
- Receiving company notifications
- QR-Code access

Sensorberg can also tailor extra features to attend the specific needs of your business.

SDK

We provide Software Development Kits (SDKs) for both iOS and Android, providing the components that make it easy to build our platform's functionality into your existing applications.

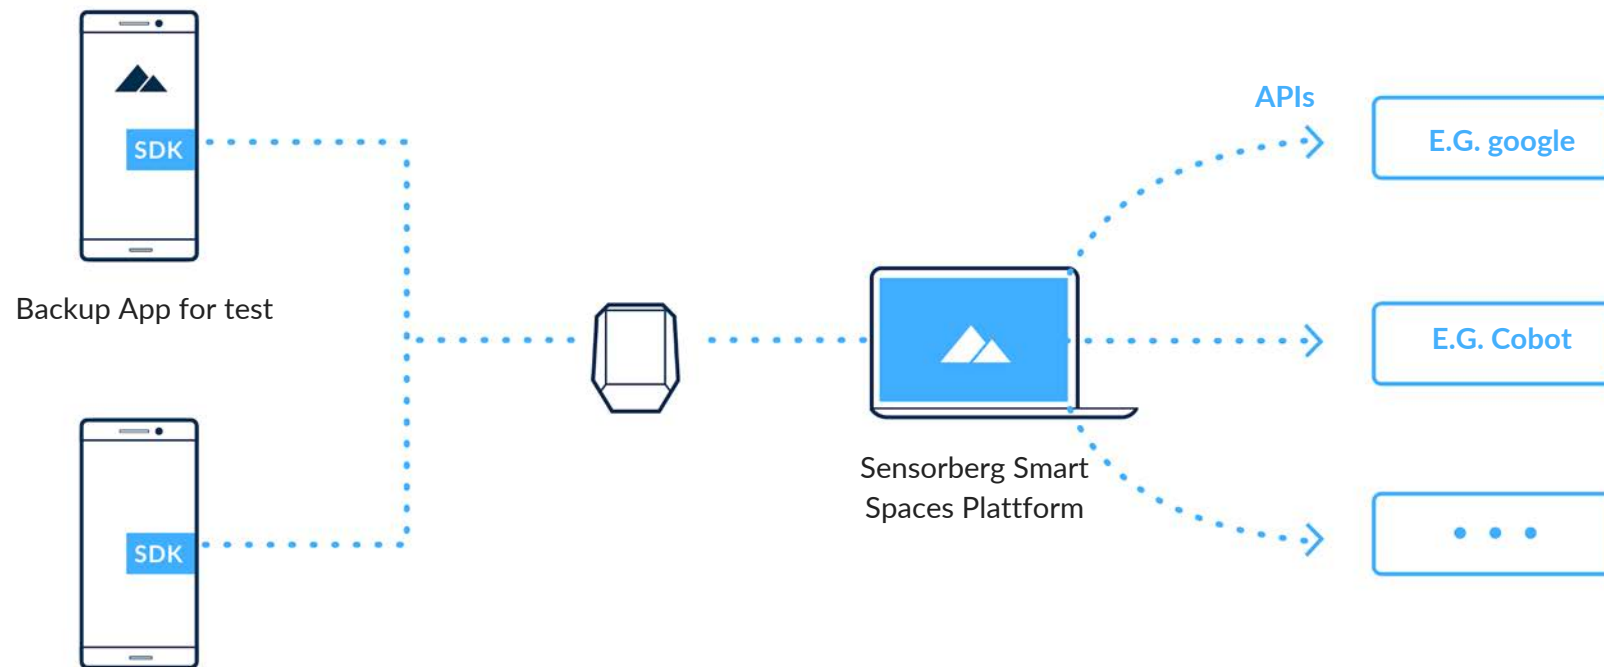

Our online documentation makes the process simple, with a support portal for developers that can also help with troubleshooting common issues.

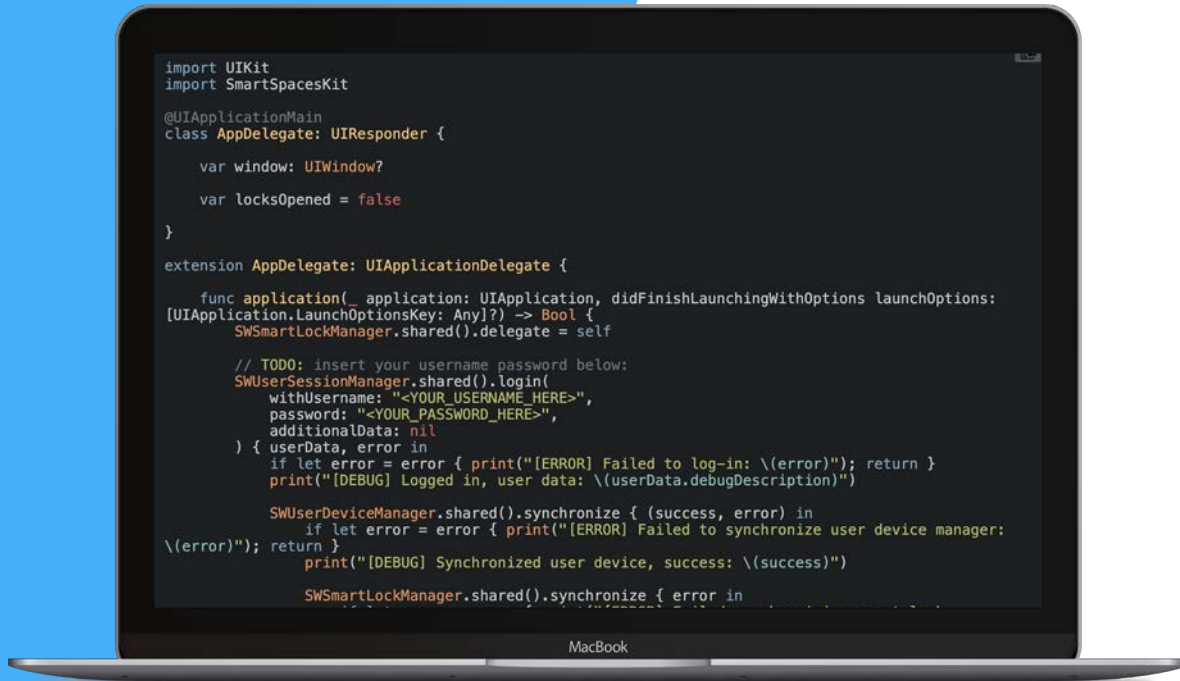

More information can be found here:

API

For integrations with your own platform or more complicated client development, our API provides highly-secure, fine-grained access to our functionality.

The API is built on industry-standard security standards and GraphQL, providing fast, responsive updates to change in metering, infrastructure, and access.

HARDWARE PRODUCT PORTFOLIO

Access Hub

Our flagship access control device, used for access control, management and monitoring. Provides access via Bluetooth and LAN, with modular NFC.

Access Hub Lite

A Wifi-enabled, slimmer profile Access Hub that can also be powered by either AC or DC, making its placement more flexible. Provides access via WiFi, Bluetooth, in-built NFC and touch-button.

Building Hub

Our standard device controller, the Building Hub manages our access control devices and connects them securely to our wider infrastructure.

Access Hub Protect

Our flagship access control device, used for access control, management and monitoring. It offers the best protection from vandalism, damage and extreme weather. Provides access via Bluetooth and LAN, with modular NFC.

Access Scanner

IP65-rated, this Bluetooth and NFC reader is built for placement inside door frames or wall interiors, or outside in the elements.

Smart Hub

An extendable hub built for smart homes and device control. It comes in a fuse-box fitting housing and can be extended with ZWave, Zigbee, LTE, and more.

Extension Hub

Able to control electrical locks and provide dry contacts to open locks. The Extension Hub combines with other Sensorberg product (e.g. Access Hub, Access Hub Lite). It does NOT work by itself.

Elevator Control Hub

Able to activate up to 16 specific floors in elevators in combination with a wall reader (Access Hub Protect) in the cabin.

Locker Hub

Our Locker Hub is built to power, monitor, and manage up to 32 devices. These can include digital locks, self-storage boxes, motion detectors, elevators, bike stations, and more.

Different types of connection between the Access Hub and the Lock

The cables are related to the type of lock. Please check with our support department to see what is best for your scenario.

ACCESS SCANNER

IP65-rated, this Bluetooth and NFC reader is built for placement inside door frames or wall interiors, or outside in the elements.

BUILDING HUB

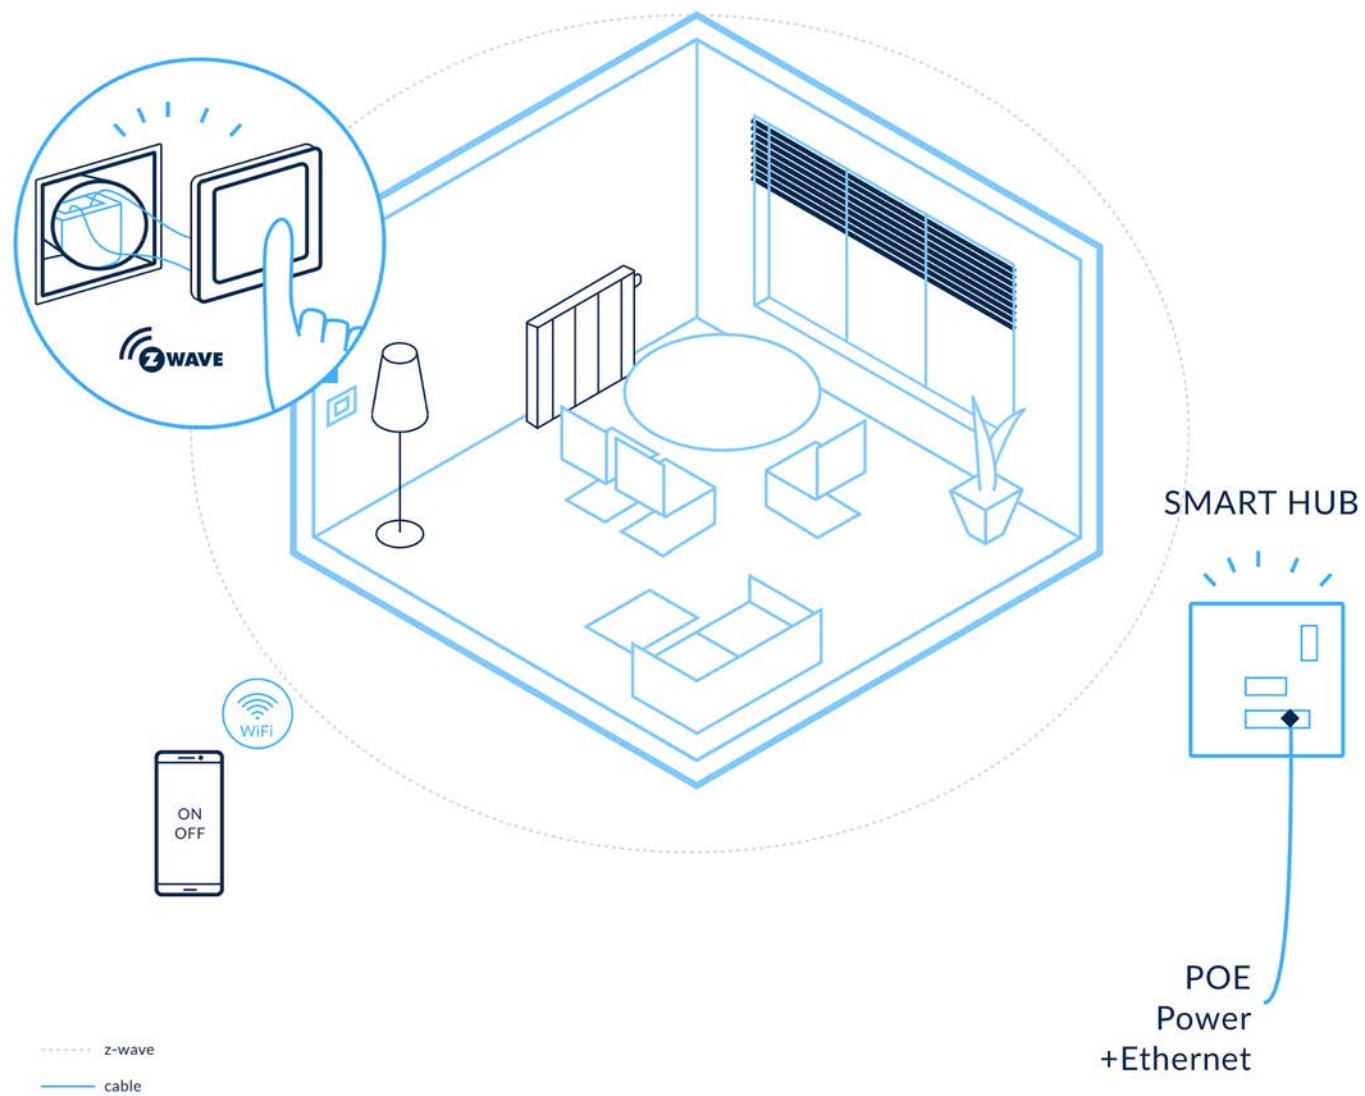

Our standard device controller, the Building Hub manages our access control devices and connects them securely to our wider infrastructure.

SMART HUB

An extendable hub built for smart homes and device control. It comes in a fuse-box fitting housing and can be extended with ZWave, EnOcean, LTE, and more.

▲ Sensorberg Smart Hub: z-wave

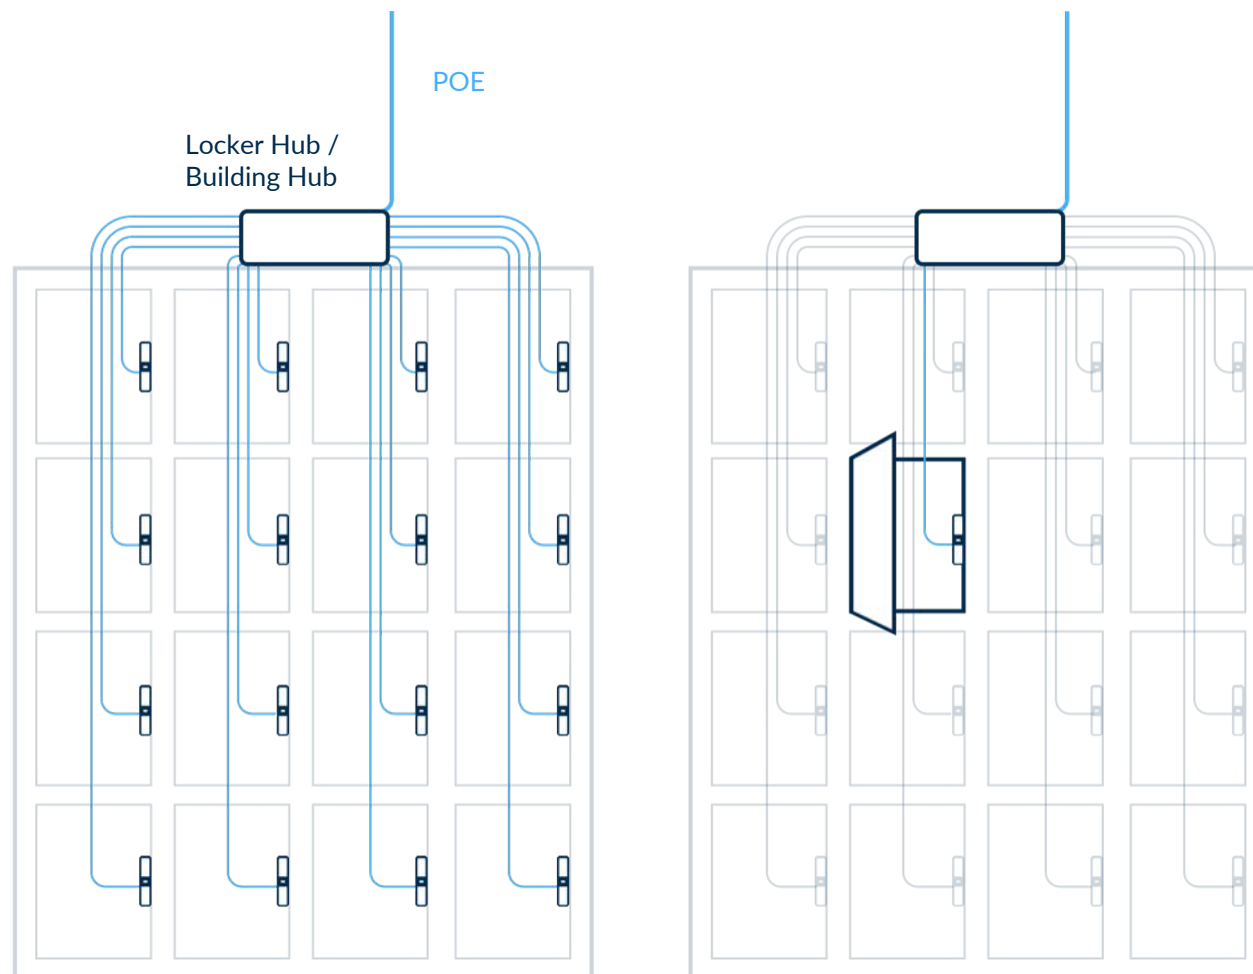

LOCKER HUB

The Locker Hub is built to power, monitor, and manage up to 32 devices. These can include digital locks, self-storage boxes, motion detectors, elevators, bike stations, and more.

Locker

The Locker Hub can power, monitor, and manage up to 32 lockers.

Food Locker

The Locker Hub can power, monitor, and manage up to 32 food lockers.

▲ Bike Locker

The Locker Hub can power, monitor, and manage up to 32 bike locks.

EXTENSION HUB

Able to control electrical locks and provide dry contacts to open locks. The Extension Hub combines with other Sensorberg product (e.g. Access Hub, Access Hub Lite). It does NOT work by itself.

Doors

The Extension Hub is able to control electrical locks and provide dry contacts to open up to 128 locks. It does not work with southCo nor Häfele locks.

ELEVATOR CONTROL HUB

Able to activate up to 16 specific floors in elevators in combination with a wall reader (Access Hub Protect) in the cabin.

▲ Elevator

The Control Unit is able to activate specific floors in elevators.

Elevator and Control Unit in the same room

Control Unit is placed in the server room

QR CODE READER

Our app provides a way to display a QR code that is valid for 30 seconds, before it automatically rotates to a new one. Can be used to access a rotating door, ensuring 1 person per time can access the door.

▲ Rotating door

The QR Code reader can be used to access a rotating door, ensuring 1 person per time can access the door.
